Human Body

An illustrated guide

October 06, 2007

This book is a guide to the structure, inner workings and common disorders of the human body. Over 700 color photos and illustrations show every part of the body

It is divided into main parts, the first of which covers human anatomy, beginning with a regional atlas of the body. Following the atlas, each body system is examined individually. To conclude this part of the book, there is a section on human life cycle. The second part of the book describes some of the most common disorders of the body and glossary of medical terms.

Sputnik I

Sputnik and The Dawn of the Space Age

October 04, 2007

History changed on October 4, 1957, when the Soviet Union successfully launched Sputnik I. The world's first artificial satellite was about the size of a basketball, weighed only 183 pounds, and took about 98 minutes to orbit the Earth on its elliptical path. That launch ushered in new political, military, technological, and scientific developments. While the Sputnik launch was a single event, it marked the start of the space age and the U.S.-U.S.S.R space race.
